

RESPIRO

THE LEADING PICK-UP BELT RAKE

IN TERMS OF
TECHNOLOGY / GROUND HUGGING / FORAGE QUALITY

**BECAUSE THE SMALL PICK-UP
MAKES THE DIFFERENCE!**

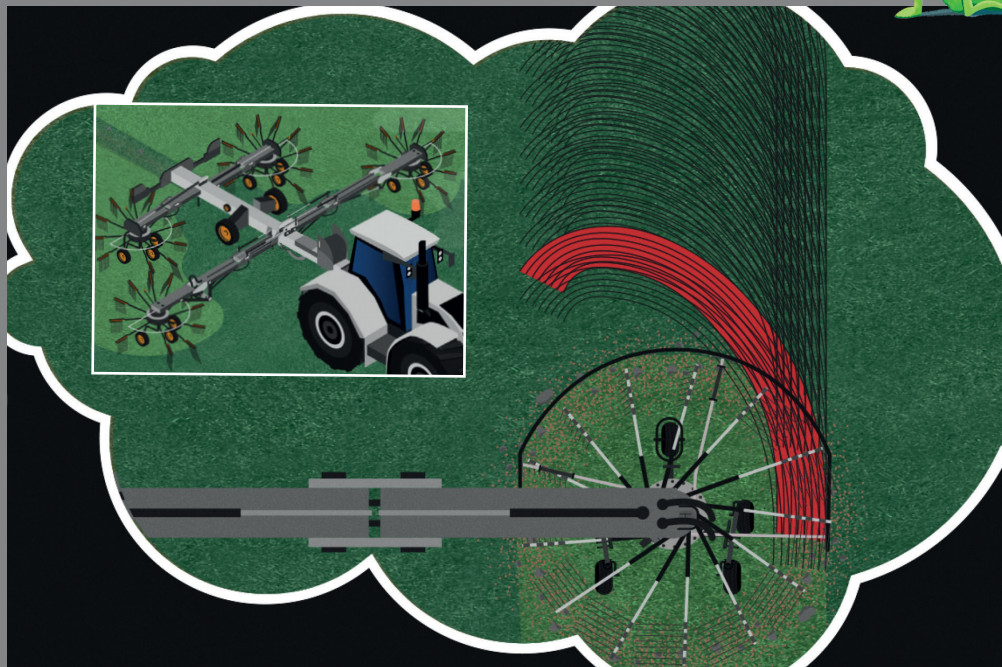

REITER
www.reiter-respiro.com

For more than 50 years...

...we sweep the fields of the world...

ROTARY RAKE

With the rotary rake, the forage is literally **CARRIED** across the field. Soiling and damage are unavoidable! More and more contractors and farmers are recognising the problem and are replacing the rotary rake with a belt rake.

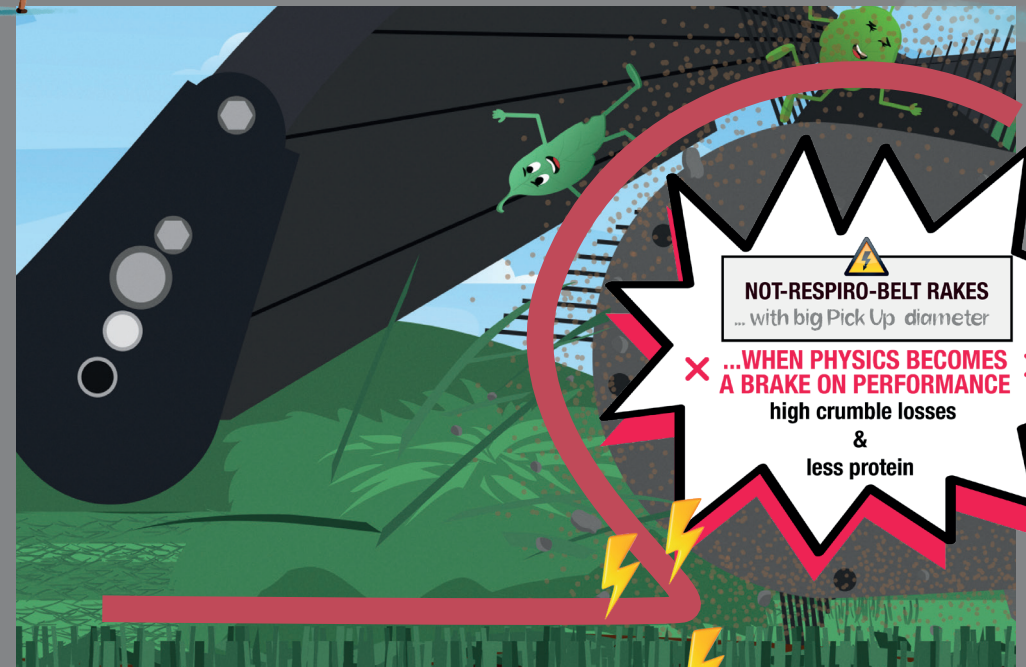

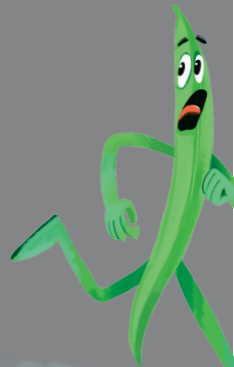

The first answer to sweeping:

...existing pick-up technology is used...

BELT RAKE WITH LARGE PICK-UP DIAMETER

Large diameter pick-up systems were originally designed to pick up swaths! The large diameter is not designed for thin feed mats, the effects are **PROBLEMATIC**.

The decisive step
into the future

performance / quality / flexibility

THE RESPIRO REVOLUTION

Belt rake with
small pick-up diameter

FLEXIBLE
PICK-UP

PERFEKT
CROP FLOW

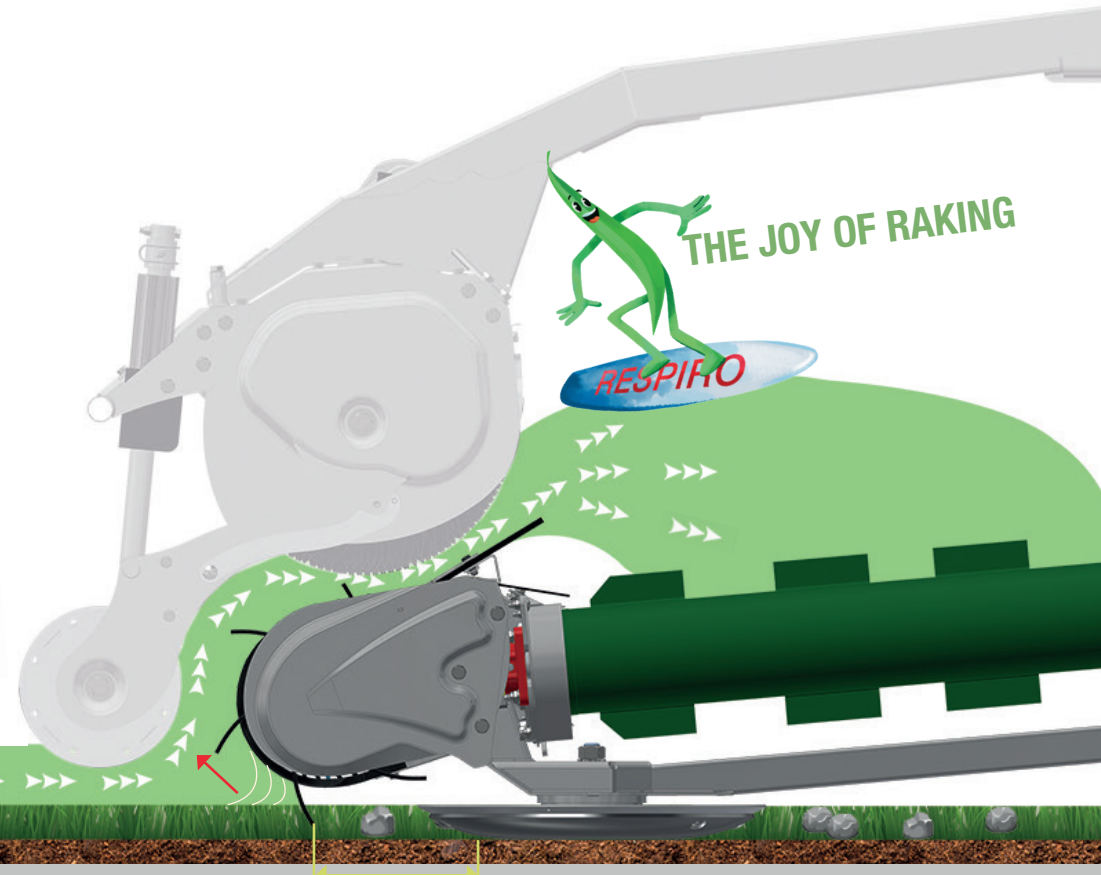

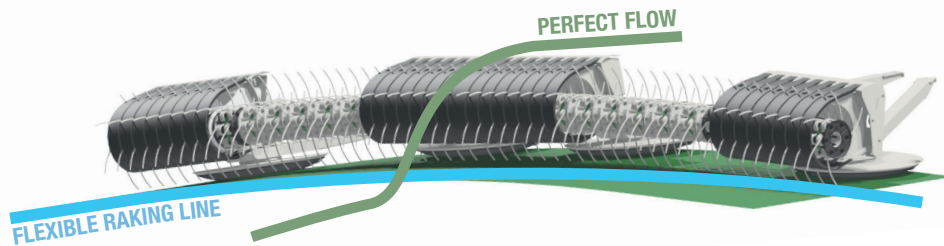

LESS
LEAF LOSSES

CLEANEST
BASIC FORAGE

MORE MILK

MORE PROFIT

Specially developed for the intake of
thin feed mats & swaths

Excellent ground hugging

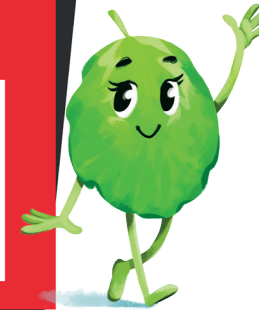

Flexible rake line - free-turning sliding discs - no other belt rake guides better - tines hardly touch the ground

RESPIRO BENEFIT: cleanest basic forage

There is much more to discover...

RESPIRO

The product range - from farmer to contractor
